

Accessibility screening report

www.icitywork.com · generated September 12, 2026

100 / 100 accessibility score

Summary

Pages checked	6 of 6 crawled
PDFs and documents found	1
Documents analyzed	1
Accessibility overlay	None detected

Findings, by severity

Fix critical issues first — they're the ones most likely to block someone from using your site at all.

Documents

A PDF with no tagged structure can't be read in a sensible order by a screen reader, regardless of what the content says.

Document	Tagged	Notes
counciliq-flyer.pdf	Yes	

Taggora runs an automated screening against WCAG 2.1 rules. It flags likely issues quickly, but it doesn't replace a manual review and it isn't a certification of compliance — no automated tool can promise that.
